4th PARTNER MEETING – SLOVENIA

We are thrilled to share the latest developments from our productive 4th Partner Meeting, which took place in Slovenia on May 3-4. This gathering was a vital opportunity for us to delve into significant topics that are shaping the trajectory of our initiative. Here's a brief overview of what we covered during the event:

Enhanced Online Tool: Our discussions centered around the enhancements to our Online Tool. We explored various avenues to make this tool even more effective and user-friendly for all stakeholders involved.

Press Releases and Flyers: Crafting impactful communication materials was another focal point. We delved into strategies to effectively convey the essence of the ENDORSEME program through press releases and informative flyers.

Future Tasks and Innovations: Looking ahead, we outlined future tasks that will steer the course of our

program. Innovation remains at the forefront as we strive to elevate the certification process.

A particular highlight that emerged from our discussions is an exciting feature within our Online Tool. This feature involves the creation of a dedicated section tailored for authorities, seafarers, MET centers, certification bodies, and crewing agencies that have embraced the ENDORSEME program. This specialized area will grant staff members with graded access the ability to seamlessly access and review all certifications. The integration of this feature into individual countries' systems or its attachment to our online platform marks a significant stride forward. We are pleased to announce that this resource will be available to all users of the ENDORSEME platform, ensuring easy access and collaboration.
